Suven Life Sciences presenting Pre-clinical data of their NCEs at Society for Neuroscience Annual Meeting (SFN-2010) at San Diego, USA

HYDERABAD, INDIA (Nov 12, 2010) – Suven Life Sciences is presenting several data presentations from their portfolio of investigational neuroscience new chemical entities (NCEs) at SFN 2010 from 13th to 19th of Nov held at San Diego, USA. Neuroscience is the annual meeting of the Society for Neuroscience (SFN) and more than 30 thousand Neuro Scientists from all over the world covering all the major Pharma, biotech and research institutes will be participating

Suven's data presentations (9) covers the early-stage compounds from **Nicotinic acetylcholine alpha-4-beta-2** receptor agonist and antagonist, **Histamine-3** receptor antagonist, Serotonin **5-HT4** receptor agonist in addition to **5HT6** antagonists to treat unmet medical needs of patients living with cognitive dysfunction associated with Alzheimer's, Schizophrenia, ADHD; Depression & Mood Disorders and Neuropathic Pain. These data presentation highlights Suven's **continued commitment to exploring new treatment options addressing unmet medical need through novel mechanisms and targets and address a market size of more than \$30 billion.**

During SFN-2010 Suven lined up several face to face meetings with major Pharma and Biotech companies to explore integrated **collaborative research programs** (CRP) and also **Drug Discovery and Development Support Services** (DDDSS) in addition to continued **discussions with global pharma majors for licensing and development of their clinical candidate SUVN-502.**

Suven is committed to neuroscience research and for development of new treatments for neurological disorders. Suven's discovery research focuses on Central Nervous System (CNS) disorders through novel mechanisms using small-molecule medicinal chemistry approaches. Suven's CNS drug discovery scientists at Hyderabad, India are pursuing innovative ways to develop treatments for a variety of CNS disorders like Alzheimer's, Schizophrenia, Depression, Cognitive disorders, Sleep, Neurodegeneration and Obesity through CNS targets.
