

## News Release

### **Suven Life Sciences presenting the Pre-clinical data of their NCEs at Society for Neuroscience (SFN-2011) Annual Meeting at Washington DC, USA**

**HYDERABAD, INDIA (Nov 14, 2011)** – Suven Life Sciences is presenting several data presentations from their portfolio of investigational neuroscience new chemical entities (NCEs) at SFN 2011 from 13<sup>th</sup> to 16<sup>th</sup> of Nov held at Washington DC, USA. Neuroscience is the annual meeting of the Society for Neuroscience (SFN) and more than 30 thousand Neuro- Scientists from all over the world covering all the major Pharma, biotech and research institutes will be participating.

Suven's nine (9) data presentations covers the early-stage compounds from **Histamine-3** receptor antagonist, **Nicotinic acetylcholine alpha-4-beta-2** receptor agonist and antagonist, Serotonin **5-HT4** receptor agonist in addition to **5HT6** antagonists to treat unmet medical needs of patients living with cognitive dysfunction associated with Alzheimer's, Schizophrenia, ADHD; Depression & Mood Disorders and Neuropathic Pain. These data presentation highlights Suven's **continued commitment to exploring new treatment options addressing unmet medical need through novel mechanisms and targets and address a market size of more than \$30 billion.**

During SFN-2011 Suven lined up several face to face meetings with major Pharma and Biotech companies to explore integrated **collaborative research programs (CRP)** and also **Drug Discovery and Development Support Services (DDDSS)** in addition to continued discussions with global pharma majors regarding their clinical candidate SUVN-502.

**Suven is committed to neuroscience research and for development of new treatments for neurological disorders. Suven's discovery research focuses on Central Nervous System (CNS) disorders** through novel mechanisms using small-molecule medicinal chemistry approaches. Suven's CNS drug discovery scientists at Hyderabad, India are pursuing innovative ways to develop treatments for a variety of CNS disorders like Alzheimer's, Schizophrenia, Depression, Cognitive disorders, Sleep, Neurodegeneration and Obesity through CNS targets.
